ENGINEERED IN JAPAN

About LINAX

Since 1977, LINAX has pioneered efficient and labor-saving surface preparation, developing products that meet customer needs. Today, our 'LINAX surface preparation method' is penetrated about 80% of the Japanese market. We continue to strive for customer satisfaction, offering high-quality, high-performance, and innovative products and services worldwide.

It's all about our customer

At LINAX, we have built a customer-centric organization. Our sales and maintenance teams lead on the front lines, backed by the technical expertise of our development and manufacturing divisions. With the full support of general affairs and management, the entire company is committed to maximize customer satisfaction.

Consulting the best equipment and methods for your site

Surface preparation requires precise handling depending on the base condition and desired finish.

At LINAX, we conduct interviews and propose not only the selection of machine but also the optimal construction methods. We go beyond product proposal and support our customers in solving their challenges with a consulting-oriented approach.

The parts you need are always ready

We provide speedy service with ample inventory and prompt shipping.

A wide variety of parts in stock

LINAX maintains an inventory of over 4,000 parts in its warehouse. Our robust stock management system supports products dating back over 20 years, guaranteeing the availability of parts and maintenance services even for long-term machine users.

Rapid shipping system

To accurately and efficiently ship number of parts, we have established a system where all parts are managed with barcodes, allowing us to grasp real-time inbound/outbound and inventory status.

High Quality, Swift Support, Total Assurance

LINAX guarantees high quality through on-site testing and pre-shipment inspections.

We also support rapid recovery of machines with repair assistance/training and immediate parts dispatch.

ISO 9001 Certified

At LINAX, we obtained ISO certification in 2006, aiming to achieve "customer satisfaction" and provide "high-quality products."

Products

LINAX pursues high performance, high durability, and ease of use to satisfy your needs.

Truly
Cable-free

Gasoline engine type

Grinder with integrated Dust extractor

K300N

A floor grinder uniquely equipped with dust extractor for easy operation. Operates with no cables providing the best mobility. Complete one person operation possible.

Electric motor type

Grinder with integrated Dust extractor

K300ENV

A floor grinder uniquely equipped with dust extractor for easy operation. Also creates beautiful finish with variable speed control.

Zero inch
to wall

Electric motor type

Grinder for Edge and Small space

K200ENV

Our small and light grinder with variable speed control for small space or the edge. You can grind almost zero inch to the wall! Best for DIY or edge of the floor.

Electric motor type

Planetary Grinder

PG600

600mm planetary grinder with variable speed control for grinding and polishing. Grinds by following the unevenness to give shiny finish.

WE SERVE SURFACING HEROES !

Gasoline engine type

Scarifier

FC-200 II

Performs outstanding scarifying and roughening of surface with Linax original cutters. A small, lightweight, yet powerful chipping machine.

Electric motor type

Scarifier

FC-200E II

Performs outstanding scarifying and roughening of surface even at small spaces. Able to chip up to 60mm(2.4in) from the wall. Same for the engine type.

Electric motor type

Groover with integrated Dust extractor

G-50ENV

Very unique dry cutting machine equipped with dust extractor for clean cutting and dust control. Also have 3 steps speed control and is easy to operate by one-person.

Gasoline engine type

Groover with integrated Dust extractor

G-50N II

Very unique dry concrete cutting machine equipped with dust extractor for clean cutting and dust control. No cables needed to realize the best mobility.

Truly
Cable-free

Electric type

Handy Scarifier

HF-50E

Handy type powerful chipper. Best for scarifying at tight space or wall edge chipping.

Electric motor type

Floor scraper

VS-3E II

Vibration scraper for removing plastic tiles, PVC, carpet etc. Blade vibrates straight back and forth for stronger and straight scraping.

Gasoline engine type

Road marking eraser

HT-4190

High erasing performance and durability with Tungsten carbide pin cutters. Our Hit and slip erasing technique is unique and the only one.

Gasoline engine type

Running track surface milling machine

U-100

For removing the worn-out surface of urethane at athletics stadium. With LINAX original milling blade, able to remove the surface precisely and smoothly. As It has self-propelled function and steering mechanism, easy to handle even the curved running tracks.
